SEASONS - READING COMPREHENSION

READ THE TEXT. WHICH SEASON IS IT?

In a year, we have four seasons. Each season brings different weather and changes in nature.

_____ is the season of new beginnings. Flowers bloom and trees grow green leaves. The weather gets warmer, and birds sing happily. We can see baby animals like chicks and bunnies.

_____ is the coldest season. Snow may fall. We wear warm coats, hats and gloves. It's time for holidays like Christmas. We have fun playing in the snow and we might build snowmen.

_____ is the warmest season. The sun shines brightly and we can wear shorts and swim in the pool. It's time for icecream, playing outside and going on vacations. The days are longer and we can enjoy lots of sunshine.

_____ is when the leaves on the trees change colour and fall to the ground. We see red, orange and yellow leaves everywhere. It's a bit cooler and we wear sweaters. We celebrate holidays like Halloween and Thanksgiving.

TRUE OR FALSE?

Flowers bloom and trees grow green leaves in summer.

We see red, orange and yellow leaves everywhere in autumn.
